SUMMARY

I am a Software Engineer skilled in both frontend and backend development. I build modern web and mobile apps using React.js, React Native, Node.js, and MongoDB. I enjoy solving problems and improving user experiences and backend systems to create fast and reliable software. I am always eager to learn new technologies and take on challenging projects.

EXPERIENCE

Software Engineer

NUCLEUS SOLUTIONS

📅 06/2025 - Present 📍 Karachi, Pakistan

Web & Mobile Application Development

- Developing modern React-based dashboards, responsive websites, and cross-platform mobile apps (React Native).
- Building secure and scalable Node.js backend services with PostgreSQL, handling APIs and complex data management.
- Integrating and maintaining third-party external APIs (e.g., CMS, GHL, Google APIs) for seamless extended functionality.
- Managing collaborative Git workflows, automated deployments, and production support with continuous performance optimization.

MERN STACK DEVELOPER

SAYLANI WELFARE TRUST

📅 01/2025 - 06/2025 📍 Karachi, Pakistan

Web & Mobile Application Development

- Built and maintained dynamic web applications and interactive platforms (Alumni App, Saylani Quiz App) with frontend and backend features.
- Improved overall UI/UX design standards and optimized backend systems for greater reliability and performance.
- Managed GitHub workflows, version control processes, branching strategies, and detailed code reviews.
- Handled application deployment, ongoing maintenance tasks, and stakeholder progress updates for multiple live projects.

EDUCATION

Bachelor of Computer Science

SZABIST University

📅 01/2021 - 06/2025

Modern Web Application

SMIT Karachi

📅 09/2024 - Present

AWS Cloud

SHERDIL IT Karachi

📅 05/2024 - 09/2024

KEY ACHIEVEMENTS

Award-Winning FYP — TaskMate App & Portal

Recognized for excellence in design and development with an award for building the TaskMate mobile app, web portal, and website, delivering a seamless user experience across platforms.

Key Contributor — Saylani Live Portal

Contributed significantly to the development and enhancement of the live Legacy of Saylani portal, improving features, system stability, and overall user experience in a production setting.

SKILLS

React Native		React JS	Next JS
Github	Tailwind	MongoDB	Express JS
Node JS	TypeScript	Hooks	PostgreSQL
Docker	RESTful APIs	MERN	Redux
Jira	Firebase	Mobile App	Azure
AWS	Python	Cross-Platform	Expo
Mobile UI/UX	Deep Linking	JWT	

PROJECTS

AI-Powered Railway ChatBot

📅 05/2025 - 06/2025

Web Based chatbot for client.

- Built an AI-powered chatbot using Gemini NLP and Selenium to scrape real-time data from dynamic UK railway websites. Integrated with a full-stack app (React, Node.js, Python, MongoDB) to deliver live railway information through an interactive chat interface.

Taskmate

📅 09/2024 - 05/2025

A mobile application project for final year

- Developed TaskMate, a cross-platform mobile application that connects service providers with clients for task assignments.
- Key features include task tracking, real-time messaging, push notifications, multi-stakeholder support, interactive UI, and comprehensive user management — designed to streamline service coordination and enhance user experience.
